Many smaller firms have become well-known for paying the same or no dues -- at or even below their wages -- to represent employers in contract disputes. But some big companies such as General Electric and Exxon Mobil can't seem to let go of what they see as their unfair advantage. As a result, some small businesses are trying to get back in compliance.

Efforts to collect dues from union members in the US are often contentious. A 2008 report by the National Employment Law Project and The Fair Labor Standards Act Institute found that in some states, employers may prohibit union members from working in unions that offer benefits such as employer contributions to collective bargaining, collective bargaining rights, and job security.
